Complete the following activities from the Lund and Andersen book. The fourth column indicates problems that you should do as practice or warm-up, and the fifth column indicates those you should write up completely to turn in (for 8 of the 10 available). You may actually do the problems in the book or, preferably, copy the pages you will be submitting for submission. If you prefer to do them entirely on separate paper, that is also fine.

Each of these is worth 4 points, so this second graphing calculator assignment is 32 points total.

| Activities | Category | Pages | Practice | To Turn-In (10/16) |
| :--- | :--- | :--- | :--- | :--- |
| $1-5$ | Graphing Linear Equations | $5-12$ | 4 | 5 (Wind chill) |
| $6-8$ | Graphing Linear Inequalities | $13-16$ | 6 |  |
| $9-10$ | More Linear Functions | $17-19$ | 9 | 10 (Mix it up) |
| $11-23$ | Assorted Functions | $20-45$ | 13,20, <br> 21,22, <br> 23 | 18 (Exponential <br> challenges) |
| $24-26$ | Matrices | $46-54$ | 24 | 25 (Solving systems of <br> equations) |
| $27-32$ | Grabolas | $55-65$ | 29 | 31 (Free-falling <br> bodies) |
| 33 | Graphing the Sine Function | $68-78$ | 38 | 33 (Circles) |
| $34-39$ | Data Analysis | $79-90$ | 40 | 43 (Periodic problems) |
| $40-45$ | Curve Fitting | $91-100$ | 46,48 | 47,50 (Bacterial <br> growth, Towers of <br> Hanoi) |
| $46-50$ |  |  |  |  |
